

# multi-micro

## Multi-Micro Soilless Combination

**Main Characteristics:** Multi-micro Soilless Combination is a stable, water-soluble and non-dusting mixture of metal chelates; Iron as DTPA chelate; manganese, copper and zinc are present in EDTA chelated form.

**Application :** Nutrigration™ (fertigation) of soilless-grown crops.

**Appearance:** Green microgranules

**pH (1% solution):** 3

**pH Stability range:** 2.5-7.5

**Solubility in water** approx. 150 g/l (20 °C)

**Bulk density untapped:** 0.84 g/cm<sup>3</sup>

**Storage:** Store in original package in a dry place at ambient temperature (below 25°C). It is advised to re-test after three years of storage. Exposure to sunlight may cause degradation of the product.

### Product analysis

Micronutrient	Content	Form
Iron	6.5 %	Fe-DTPA
Manganese	3.48 %	Mn-EDTA
Zinc	1.02 %	Zn-EDTA
Copper	0.76 %	Cu-EDTA
Molybdenum	0.485 %	Ammonium molybdate

Product meets requirements for an EC-fertilizer.

**Packaging :** 1kg cardboard boxes with an inside polyethylene lining
